

Youssef Ahmed Elsayed

DevOps Engineer — Cloud & Platform

Cairo, Egypt

Military Status: Postponed

+20 1212056856

<https://www.linkedin.com/in/youssef-ahmed-918047371/> – youseefahme425@gmail.com – <https://github.com/UsseF-1>

Summary

Results-driven DevOps Engineer skilled in automation, quality assurance, and secure system design across the full product lifecycle. Experienced in optimizing workflows, reducing deployment time, and improving system reliability and user experience. Demonstrates strong leadership skills, with the ability to identify gaps and drive continuous improvement in fast-paced environments.

Education

Bachelor Of Computer Science

2023 – 2027

Higher Technological Institute – 10th of Ramadan, Computer Science Department

Courses & Certificate

DevOps Trainee & Group Leader – Digital Egypt Pioneers Initiative (DEPI)

120H

DevOps Track – The Ministry of Communications and Information Technology (MCIT) — Ongoing

- Led a cross-functional DevOps team, coordinating tasks, resolving blockers, and ensuring timely delivery of technical milestones.
- Designed and implemented CI/CD workflows using Git, Jenkins, Docker, and Kubernetes to automate application delivery.
- Provisioned and configured infrastructure using Terraform and Ansible following Infrastructure as Code (IaC) best practices.
- Built monitoring and observability pipelines with Prometheus and Grafana to track system performance and reliability.

Master DevOps with AI, AWS, GCP, Linux, Jenkins, Gitlab, Github Actions, Docker, Kubernetes, Terraform, Ansible & GitOps (Udemy)

64H

- Implemented cloud architectures on AWS using IAM, EC2, RDS, S3, VPC, and Route53 with security best practices.
- Built automated CI/CD pipelines using Jenkins, GitHub Actions, and GitLab CI/CD for continuous delivery.
- Provisioned scalable infrastructure using Terraform and automated configuration management with Ansible.
- Deployed containerized applications using Docker and Kubernetes with Helm and implemented GitOps workflows.

Projects

GitOps Vprofile Platform

- Built a GitOps platform on AWS EKS using Terraform and CI/CD, reducing manual deployments by 80%.

Technologies: AWS, Terraform, Kubernetes, Helm, Git, GitHub Action, Docker, GitHub Secrets, IAM Roles, Java (Tomcat), Maven

Link: <https://github.com/UsseF-1/GitOps-Vprofile-Platform>

Monitoring & Observability Platform on AWS

- Implemented monitoring stack (Prometheus, Grafana, Loki), reducing incident response time by 40%.

Technologies: Prometheus, Node Exporter, Grafana, Loki, Slack, Docker, K8S, AWS, Terraform, GitHub Actions, Python, Flask, Trivy

Link: <https://github.com/UsseF-1/Monitoring-Observability-Platform-on-AWS>

AWS CI/CD Pipeline for Java Web Application (vProfile)

- Built AWS CI/CD pipeline automating Java app deployment, reducing release time by 60%.

Technologies: AWS, Terraform, CloudFormation, AWS Codepipeline, AWS CodeBuild, Docker, Maven, Java, MySQL, Git, Bitbucket

Link: <https://github.com/UsseF-1/AWSCI-CD-Pipeline-for-Java-Web-Application-vProfile>

Extracurricular Activities

Team Leader – DevOps Training – (MCIT) – (DEPI)

Leader technical team, coordinated tasks, and promoted collaboration while working on real-world DevOps projects and a capstone project.

Competitive Programming

ECPC 2023

- Solving Strong Problems and Topics by Programming Language (C++)
- Achieved 6th place in the Egyptian Collegiate Programming Contest (ECPC 2023)

AI Competition Organizer – National Telecommunication Institute (NTI) & Creativa Innovation Hubs

Coordinated an AI competition with National Telecommunication Institute & Creativa Innovation Hubs, managing participants and event operations.

Skills

Technical Skills

Cloud & AWS: EC2, ALB, ASG, RDS, S3, Route53, CloudFront, IAM, VPC, NAT Gateway, IGW, CloudWatch, SNS, EventBridge, Lambda, ECS, ECR, EKS, Elastic Beanstalk, AWS CLI

Containers & Microservices: Docker, Dockerfile, Multi-stage Builds, Docker Compose, NGINX Reverse Proxy, Volumes, Networking, Image Optimization, Container Debugging

CI/CD & Automation: AWSCodePipeline, CodeBuild, Jenkins, GitHub Actions, GitLab, Maven, Bash Scripting, Python Automation (boto3)

Monitoring & Observability: Prometheus, PromQL, Grafana, Loki, Alloy, Node Exporter, Alerting & Incident Response (Slack), SRE Golden Signals

Infrastructure as Code: Terraform (Modules, Lifecycle) code structure, variable, provisioners, Ansible, inventory, Ad Hoc Commands, modules, debug, decision making, handlers, modules

Systems & Security: Linux, systemd, SSH, Networking Fundamentals, IAM Roles, RBAC, Authentication & Authorization

K8S: pods, services, ReplicaSet, Deployment, K8S architecture, network, namespaces, storage, Volumes, Configuration, logging, kubectl CLI, ConfigMap, ingress, helm, DaemonSet, StatefulSet, Job & CronJob

Soft Skills

Teamwork & Collaboration – Communication – Problem solving – Critical Thinking – Time Management – Flexibility – Prioritization – Leadership & Team Management – Attention to Detail – Continuous Learning – Insightful Thinking – Mentorship

Computer Skills

Microsoft Office, Windows OS and file management, Internet research, Email management, Google Workspace, Basic troubleshooting and software installation

Languages

Arabic (Native) — English (Professional)
